DETAILED ACTION

Response to Arguments/Amendment

1. Upon further consideration, the allowability of claim 4, based on the previous art rejection as set forth in the office action mailed on 10/17/2008, is withdrawn in view of the new ground of rejection of claim 4 under 35 U.S.C. 112 second paragraph as discussed below

Upon further search and consideration. The indicated allowability of claim 6 is withdrawn in view of the newly discovered reference(s) to Chen et al (US 6,833,081). Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 4 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then

narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 4 recites the broad recitation " wherein the phosphoric acid concentration is chosen to range between 0.01 and 5% by weight", and the claim also recites " and preferably between 0.1 and 1% by weight" which is the narrower statement of the range/limitation.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 6 is rejected under 35 U.S.C. 102(e) as being anticipated by Chen et al
(US 6,833,081)

Chen discloses a method for metal etching a semiconductor device with a substrate 20 and a semiconductor body which comprises one active semiconductor element, wherein, after the semiconductor element has been formed, a layered

structure is provided comprising one electrically conductive layer 22, wherein an opening is formed in the layered structure by means of a patterned photoresist layer 24 and an etch process (col 2, lines 25-37; fig. 2), wherein residues are formed at the surface of the semiconductor body during the etch process (col 2, lines 40-43), wherein the photoresist layer is ashed, after the etch process, by means of a treatment with an oxygen-containing compound (col 2, lines 38-40) after which the surface of the semiconductor body is cleaned using a cleaning agent containing a diluted solution of an acid (sulfuric acid) in DI water and being heated to a temperature above room temperature, as a result of which the residues formed are removed from the surface, characterized in that sulphuric acid is chosen for the acid in the cleaning agent, wherein the temperature is chosen in the range between 25- 50° C (col 2, 60-65) which overlaps the claimed range of 20 and 60° C

Allowable Subject Matter

4. Claim 4 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
